DETAILED ACTION

1. Applicant's response filed on 03/31/2006 has been fully considered. Claims 11-20 are canceled, and claims 1-10 are pending.

Claim Rejections - 35 USC § 103

2. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sismondi et al. (US 6,387,473 B1) in view of Li (US 6,183,844 B1).

Sismondi discloses an ink jet receiving sheet comprising a support and ink receiving layers on the support (abstract). The support is described on col. 4, line 30. The ink receiving layers comprise a non-ionic surfactant (col. 3, line 31 thru col. 4, line 29), a binder (col. 5, line 63 thru col. 6, line 48), inorganic particles (col. 7, line 11 thru col. 24), an additional surfactant (col. 7, line 43 thru col. 61), a mordant (col. 7, line 62 thru col. 8, line 61), and a hardener (col. 8, line 63 thru col. 9, line 17). The ink receiving layers further comprise glossiness improving agents, matting agents, a plasticizer, biocides and conventional additives; however, these additional components are added to improve the pictorial or physical properties of the image. Sismondi does not disclose the use of siloxane containing surfactant as the non-ionic surfactant.

Sismondi discloses the claimed invention except the non-ionic siloxane containing surfactant. Li shows that a non-ionic surfactant by a trade name Silwet is equivalent to non-ionic surfactants by trade Names Fluorad and Triton (col. 16, line 61 thru col. 17, line 4). Therefore, because these non-ionic surfactants were art recognized equivalents at the time the invention was made, one of ordinary skill in the

Art Unit: 1774

art would have been found it obvious to substitute non-ionic surfactant by trade Names Fluorad or Triton for non-ionic surfactant by a trade name Silwet.

Response to Arguments

3. Applicant's argument is based on that the current invention excludes the ingredients of Sismondi not specified in claim 1. This argument is not persuasive because in Sismondi, the ingredients other than the non-ionic surfactant and the binder are additional adjuvant (col. 5, line 55). In other words, the ingredients of Sismondi that are not specified in claims 1 are optional ingredients. Thus claims 1-10 stand rejected.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
